

CODING WITH SCRATCH

OVERVIEW

In this beginner-friendly workshop, you'll learn how to use Scratch—a simple coding tool that lets you create your own games, animations, and stories. You'll explore how to snap blocks of code together to make characters move, talk, and react to each other. Step by step, you'll build a basic project while learning key coding ideas like sequences, loops, and events. No experience needed, just bring your imagination! By the end, you'll have made something you can share and be proud of.

OUTCOMES

After attending the Scratch Coding Session, you'll have created your own simple game or animation using block-based coding. You'll understand how to use Scratch to make characters move, speak, and react, and learn the basics of coding with sequences, loops, and events.

You'll build confidence in using technology, practice creative thinking, and solve problems step by step. You'll also work with others, share ideas, and explore how coding can be both fun and useful.

WHAT ARE PEOPLE SAYING?

I'm here today to develop a website, it's been a brilliant opportunity that has allowed us to get a professional looking face online.

I've learned so much and it has been really simplified and now I feel confident to go home and work on it.

PROGRAM AND STRATEGY

1

Youth Engagement & Experience

Empowering young people through hands-on digital experiences, skills development, and real-world opportunities to build confidence and career readiness

2

Digital Literacy Education

Offering tailored training programs that equip individuals of all ages with essential digital skills from basic computer use to advanced online safety practices.

3

Community Partnerships

Collaborating with local organizations, schools, and businesses to expand the reach and impact of digital inclusion initiatives, fostering a supportive ecosystem.

4

Advocacy and Awareness

Raising public awareness about the importance of digital inclusion and advocating for policies that promote equal access to technology and the internet.

OUR IMPACT

37

Internships & voluntary opportunities created.

£15,000+

Financial Savings to 3rd sector organisations.

£36000

Value of social value produced to date.

WAYS TO HELP OR SUPPORT

Become A Volunteer

Help bridge the digital divide and make a real difference in people's lives!

Donate Our Program or Campaign

Support digital inclusion by donating money or equipment—your contribution helps provide access to technology, empowering those in need.

Follow and share!

Help spread the word by sharing our social posts, every share increases awareness, reaches those in need, and brings us closer to bridging the digital divide!
