

MAKEY MAKEY

OVERVIEW

In this creative workshop, you'll learn how to turn everyday objects, like bananas, foil, or playdough, into touchable buttons that control a computer.

Using a Makey Makey kit and simple Scratch coding, you'll explore how circuits work and how to connect the real world to the digital one. Step by step, you'll build a fun interactive project, like a musical fruit piano or a custom game controller. No experience needed—just your curiosity! playful.

OUTCOMES

After attending the Makey Makey session, you'll understand how to create simple circuits and connect real-world objects to your computer. You'll explore how electricity flows and how everyday items—like fruit, foil, or paperclips—can become fun, interactive controls.

You'll use Scratch to bring your invention to life, learning basic coding skills like sequences and events. You'll also build problem-solving and creative thinking as you test and improve your project.

WHAT ARE PEOPLE SAYING?

I'm here today to develop a website, it's been a brilliant opportunity that has allowed us to get a professional looking face online.

I've learned so much and it has been really simplified and now I feel confident to go home and work on it.

PROGRAM AND STRATEGY

1

Youth Engagement & Experience

Empowering young people through hands-on digital experiences, skills development, and real-world opportunities to build confidence and career readiness

2

Digital Literacy Education

Offering tailored training programs that equip individuals of all ages with essential digital skills from basic computer use to advanced online safety practices.

3

Community Partnerships

Collaborating with local organizations, schools, and businesses to expand the reach and impact of digital inclusion initiatives, fostering a supportive ecosystem.

4

Advocacy and Awareness

Raising public awareness about the importance of digital inclusion and advocating for policies that promote equal access to technology and the internet.

OUR IMPACT

37

Internships & voluntary opportunities created.

£15,000+

Financial Savings to 3rd sector organisations.

£36000

Value of social value produced to date.

WAYS TO HELP OR SUPPORT

Become A Volunteer

Help bridge the digital divide and make a real difference in people's lives!

Donate Our Program or Campaign

Support digital inclusion by donating money or equipment—your contribution helps provide access to technology, empowering those in need.

Follow and share!

Help spread the word by sharing our social posts, every share increases awareness, reaches those in need, and brings us closer to bridging the digital divide!
